

## Letting each group have its own permissions

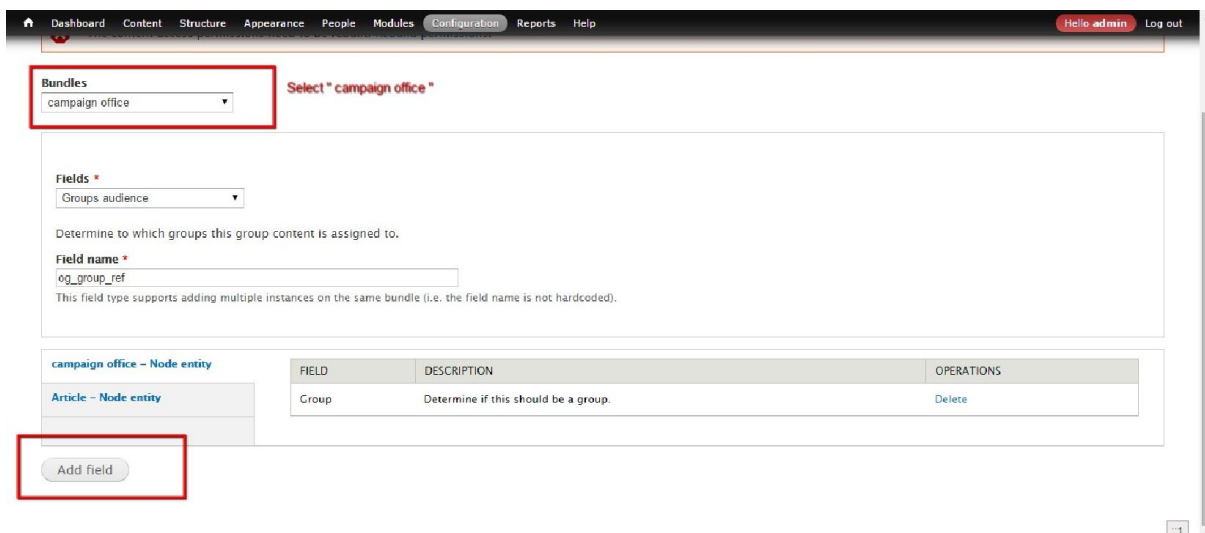

Here we are going to how to give permissions to each group

- Goto the **headquarter** page, click on group tab

Here you can see **(read only)** is written with the permission and roles link. Is that because we need to give permission to the all groups.

To do so goto "**Configuration**" >> "**OG field settings** "

Bundles

campaign office

Fields \*

Group roles and permissions

Determine if group should use default roles and permissions.

campaign office – Node entity

Article – Node entity

FIELD	DESCRIPTION
Group	Determine if this should be a group.
Groups audience	Determine to which groups this group content is assigned to.

Add field

Now fields are added to group

Fields \*

Groups audience

Determine to which groups this group content is assigned to.

Field name \*

og\_group\_ref

This field type supports adding multiple instances on the same bundle (i.e. the field name is not hardcoded).

campaign office – Node entity

Article – Node entity

FIELD	DESCRIPTION	OPERATIONS
Group	Determine if this should be a group.	Delete
Groups audience	Determine to which groups this group content is assigned to.	Delete
Group roles and permissions	Determine if group should use default roles and permissions.	Delete

➤ Now goto **"content"** and Edit the **"headquater"** content

In **"Group roles and permissions"** field select **"Override default roles and permissions "**
