Organic groups

Specify how OG should treat content of this type. Content may behave as a group, as group content, or as individual content.

☐ Group
Set the content type to be a group, that content will be associated with, and will have group membership.

☒ Group content
Set the content type to be a group content, that can be associated with groups.

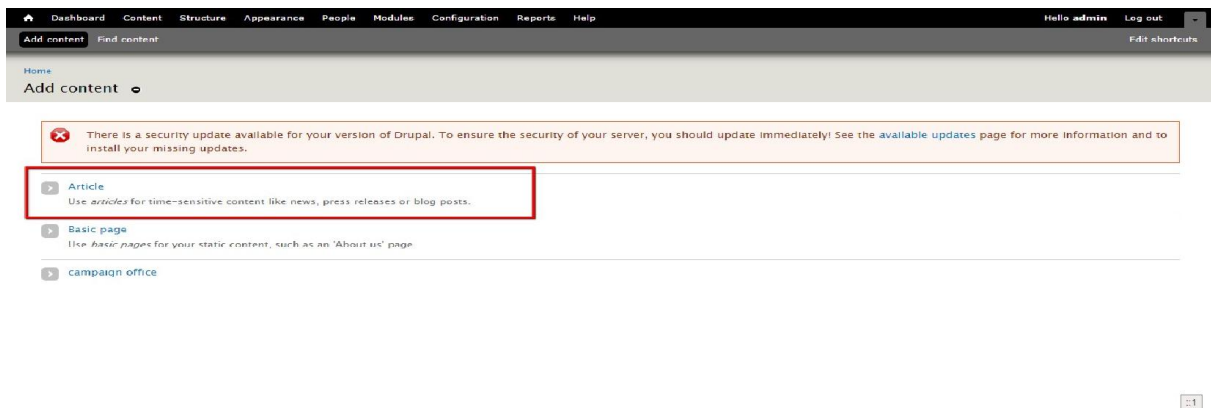

Target type
Node
The entity type that can be referenced thru this field.

Target bundles
campaign office
The bundles of the entity type that can be referenced. Optional, leave empty for all bundles.

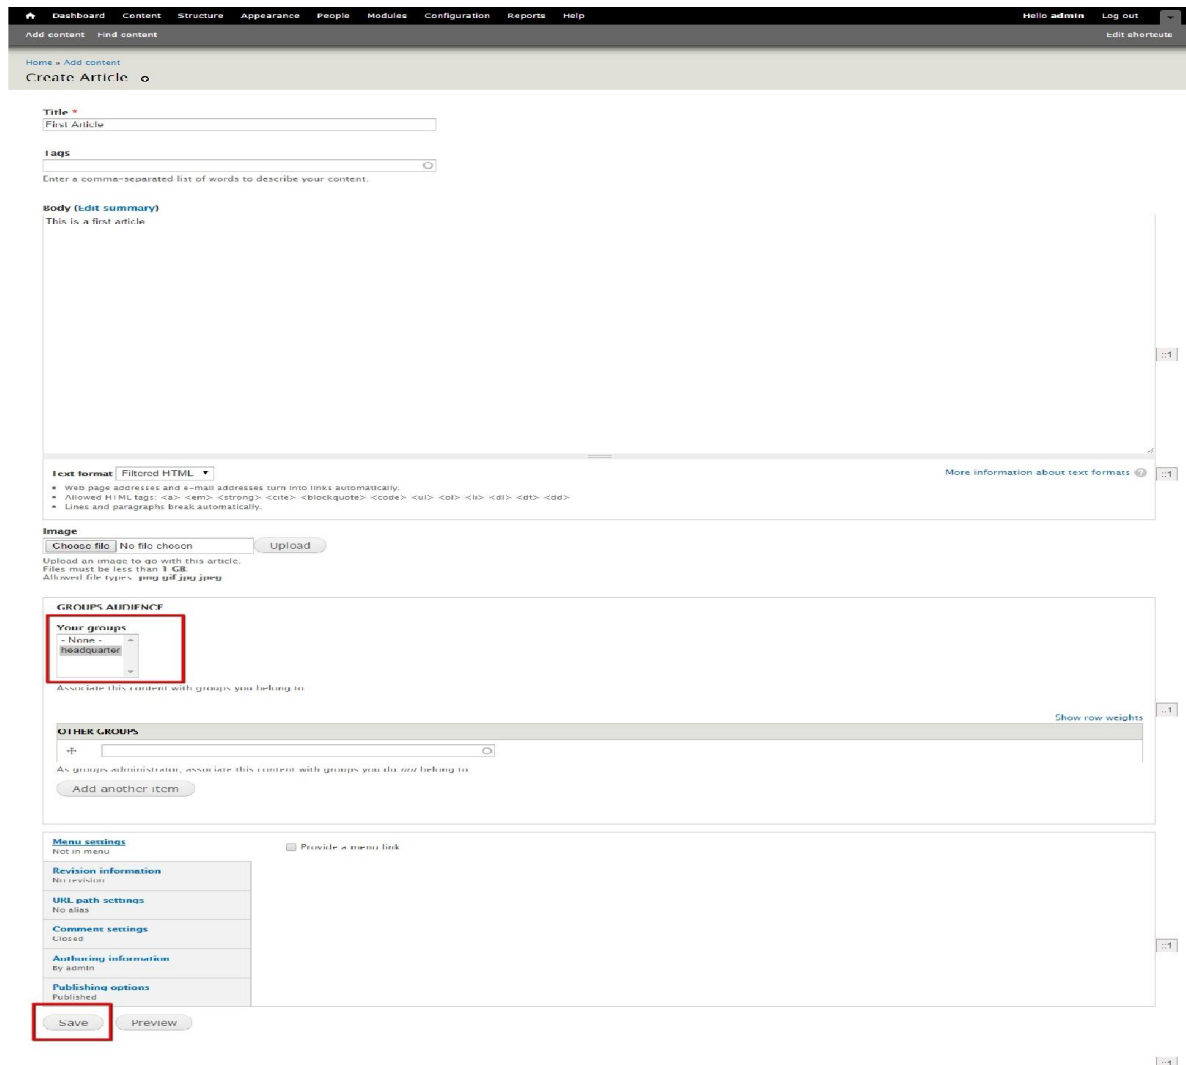

Save content type Delete content type

- Save the change.

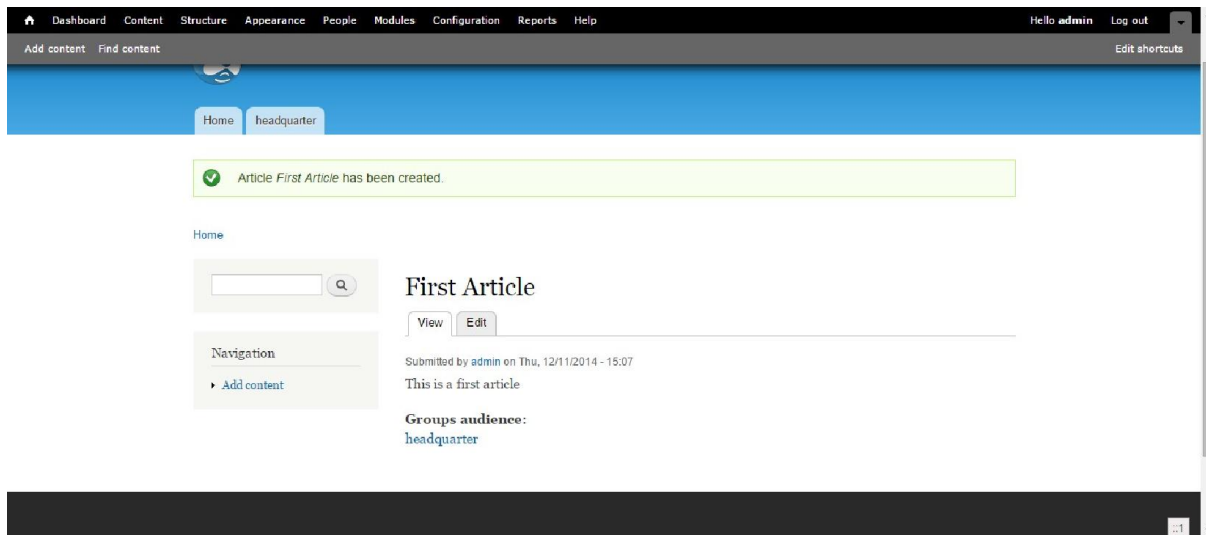

➤ Create Article content

➤ Select headquarters in "Group Audience"

- Article node created.

Now, we require **views and panels** to see group content in **headquarter** page.

Content Management in OG

- Open **Structure > Content Types**
- Edit **Article** Settings

There is a security update available for your version of Drupal. To ensure the security of your server, you should update immediately! See the [available updates](#) page for more information and to install your missing updates.

Organic groups

Specify how OG should treat content of this type. Content may behave as a group, as group content, or may not participate in OG at all.

☐ Group **It is a group type**

Set the content type to be a group, that content will be associated with, and will have group members.

☒ Group content **Group content associated with available groups.**

Set the content type to be a group content, that can be associated with groups.

To unset the group content definition or change the settings you should delete the "Groups audience" field via [Manage fields](#).

Target type

Node

The entity type that can be referenced thru this field.

Target bundles

campaign office
